

CyrusOne Data Center

Chicago-Lombard

1850 Springer Drive | Lombard, IL 60148

60,000 square feet

Built to top-tier standards, this facility boasts two diverse and redundant utility power feeds, and an N+1 configuration on generator power. The facility offers biometric and key card security for some of the most demanding security and regulatory needs.

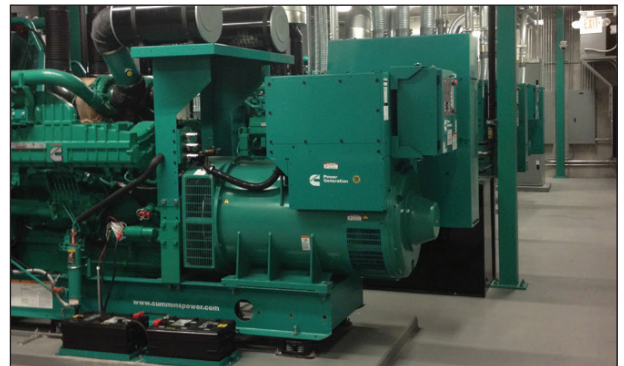

Convenient Location

The CyrusOne Lombard/Chicago data center resides 20 miles west of the heart of downtown Chicago and close to O'Hare International Airport.

A high-speed, high capacity network connection is available directly to downtown Chicago's telecommunications hub, providing a strong network offering to accommodate customers with specific latency and/or replication needs.

Overview

- 60,000 sq. ft. data center / 14,000 colocation square feet(CSF)
- Expansion space available for custom data halls or office space
- SSAE 16 (SOC I type II), PCI DSS (sec 9 & 12), HIPAA, ISO 27001, FISMA
- High Performance Computing (HPC) capable, supports 150 wpsf
- Carrier-neutral, as well as dark-fiber connectivity option
- Separate cable tray for fiber and copper
- 24x7 staffed NOCC and remote hands support.

Power

- 9MW of critical capacity
- Multiple levels of redundancy available within same footprint
- Both a 1.5MW and a 2MW transformer
- 150kVA PDUs with single feed
- Scalable 2.4 MW Cummins dedicated generators
- 8,000 gallon site capacity

Cooling

- 24 and 36-inch raised floor design
- Glycol cooling loop
- Utilizes CRAC unit with 420 ton cooling capacity

Security

- Biometric security scans
- Video surveillance and recording of the exterior and interior of facility
- Biometric and key card (color coded) security for rigid access control
- Cabinet and cage security options include individual locks and biometric scanners

Fire Protection

- Very Early Smoke Detection Apparatus (VESDA) system; sampling air in parts per million coupled with a zonal dual-action interlocking dry-pipe system

Amenities

- 20 minute drive to Chicago O'Hare Airport
- 10 National Chain Hotels within one mile
- 20 miles west of the heart of downtown Chicago

Specializing in highly reliable enterprise-class carrier-neutral data centers, CyrusOne provides mission-critical facilities that protect and ensure continual operation of IT infrastructure across a global footprint of locations. CyrusOne data centers provide flexibility, reliability and security delivered through a unique customer-centric platform, while the CyrusOne National InternetExchange provides robust connectivity options to drive revenue, reduce expenses and improve service quality for the enterprise.
