

The Trend Towards IT Outsourcing

For IT leaders, managing their data centers has become more complex, more expensive, and more painful. As a result, they will be spending more of their budgets on outsourcing more of their applications. **69%** say “managing their data center operations is extremely painful.”

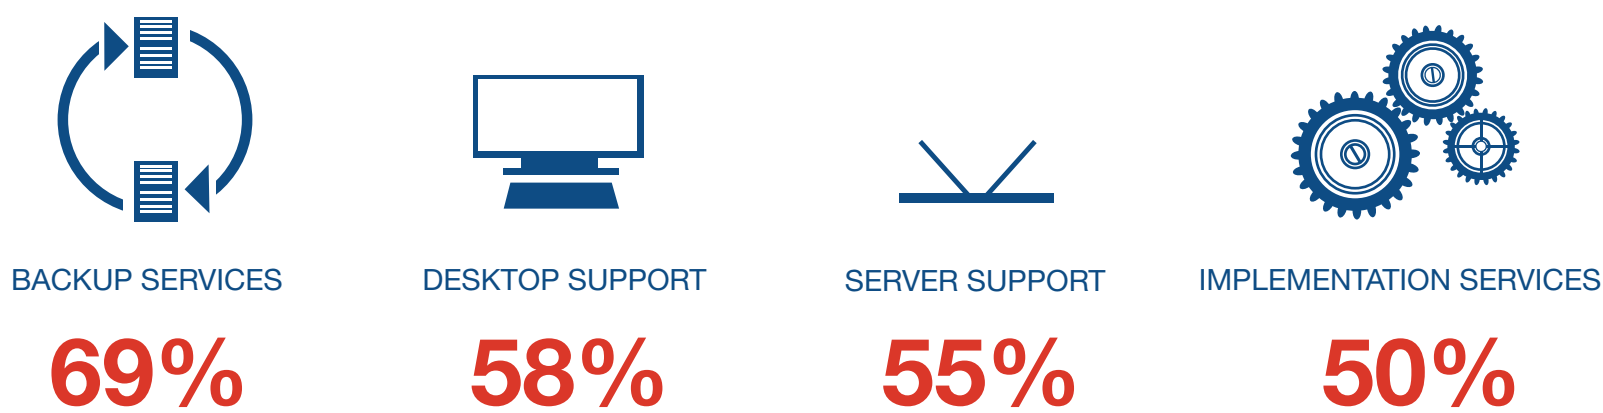

The average IT budget for 2015 is approximately **\$94 million**.

32% will go to outsourced IT services and this is expected to increase to **44%** of the IT budget in two years.
